According to Ryans, a former fullback for the San Francisco 49ers, the only time Americans are ever going to come together is when you're forced to do so and can't leave a gun in your house. As a reminder, Ryans is now part of the Nike company, but he was fired from the company in 2015 before he even stepped foot on the field. What's New in the?

Avengers: Endgame is now playing in theaters and fans are in wonderment. It will certainly be remembered as the last installment of the Avengers trilogy. A lot of things are unclear in this film, much like every other Marvel Studios movie. A lot of people are wondering if anything will happen in the post-credits scene. For one, the Russo Brothers, directors of Avengers: Infinity War and Avengers: Endgame have made it quite clear that they want to surprise and do something with the little-

asked-for post-credits scene. So, if you are wondering about the post-credits scene, you can certainly watch out for the following 6 things.

1. The Universal consciousness In *Avengers: Infinity War*, most of the characters stated that they felt like one entity. While in *Avengers: Endgame*, they were actually one. This is probably the closest to the Universal consciousness and has been reflected in many interviews and statements by the Russo Brothers. This could be a big spoiler for *Infinity War*. In the post-credits scene, we see that Captain America makes everyone believe that they are individual entities. Tony Stark states that the Avengers are all super-heroes. He also makes it clear that they are not one. This is a commentary on the fact that the Universal consciousness has manifested as a single being.
2. The Avengers are together. Yes, it's been a long journey. This is evident in the post-credits scene. Black Widow states that they have been waiting for this moment for a long time. The rest of the Avengers also seem to agree that they have been working towards this moment for a long time. This indicates that the Universal consciousness is too powerful. It has a master plan that only the Avengers can work towards.
3. The untimely death of Thanos In the post-credits scene, we see Thanos floating lifelessly towards the moon. Most of us know that he is already dead in the MCU, but we see that he is suddenly lifeless in this scene. It is hard not to take it seriously when the Russo Brothers state that they did not want to go this easy on us. Thanos was the one responsible for everything that had happened.
4. The timeline Apostles are now out of power and all of them have gone through

the events of the movie. This means that Tony Stark's ship must have been hit by
